

Mihretab Nega

Full-Stack Developer

London, W3, UK | mihretabtesfahun2124@gmail.com | mihretab.org
github.com/2118476 | linkedin.com/in/mihretab-nega

PROFESSIONAL SUMMARY

London-based full-stack developer with a Computer Science background, focused on building practical web applications that real people use. I work across the whole stack — React interfaces, Java/Spring Boot REST APIs, SQL databases, JWT authentication, and cloud deployment — and enjoy projects where the frontend, backend, data model, and deployment all have to work together cleanly. Available for UK software developer roles and selected full-stack freelance projects.

TECHNICAL SKILLS

Frontend	React, JavaScript, HTML, SCSS/CSS, Responsive design, Vite
Backend	Java, Spring Boot, Spring Security, REST APIs, Service layers, Validation
Databases	PostgreSQL, MySQL, SQL schema design, Supabase
Auth & Security	JWT, BCrypt, Role-based access control
Deployment & Tools	Netlify, Render, Git/GitHub, Postman, Docker basics, Environment config
Automation	Twilio (SMS & Voice), WhatsApp workflows, Android / Play Console

EXPERIENCE

Freelance Full-Stack Developer	<i>Self-employed · Remote</i>
- Built and shipped real products for a diaspora community, local businesses, and service providers. - Delivered React frontends, Spring Boot REST APIs, SQL schemas, JWT authentication, and cloud deployment end to end. - Worked directly with owners to turn manual, spreadsheet-and-WhatsApp workflows into dependable software.	
Independent Product Builds	<i>Self-directed</i>
- Designed and prototyped tools including a job-search assistant and a trading-signal monitoring dashboard. - Integrated third-party APIs such as Twilio for SMS and voice workflows. - Own product design, architecture, and delivery for each build.	

SELECTED PROJECTS

UK Habesha — Community Platform	— Mobile-first platform bringing profiles, local services, rentals, events, and messaging into one structured experience for the UK Habesha diaspora.
React, Spring Boot, PostgreSQL, JWT, Render, Netlify	
Hair Salon Booking System	— Full-stack booking platform with customer self-service, admin controls, staff availability, and role-based authentication.
Java, Spring Boot, MySQL, React, JWT	
SMS & Voice IVR App	— Twilio-based web app for SMS, browser voice workflows, IVR-style call handling, recordings, and communication history.
React, Spring Boot, MySQL, Twilio, REST APIs	

EDUCATION

BSc Computer Science	<i>Sept 2021 – June 2024</i>
Brunel University London	
Modules: Software Development, Algorithms, Cybersecurity, AI, and Networking. Final year project: Hair Salon Booking System.	
Access to HE Diploma — Electronics & Software Engineering	<i>Sept 2020 – June 2021</i>
Newham College of Further Education	
Distinctions in Programming, Project Management, and Web Design.
